

37% Electricity Reduction over 2 week period

NV5

COVID-19 (NOVEL CORONAVIRUS) EMERGENCY ENERGY COST REDUCTION SERVICES

“STAY AT HOME” orders have led to reduced occupancy in most buildings, which are wasting lots of precious money.

NV5 can implement short-term energy cost reductions by expertly, and *remotely*, managing energy systems into an Asset Protection Mode. The graphics to the left show **30-40% in actual cost savings** from several clients over the past 2 months in Asia.

NV5’s Energy Efficiency experts can help your organization by:

- » Talking with your FM staff to understand practical, and code compliant areas of opportunity for cost reduction
- » Remotely connecting to BMS with our Analytics™ platform to identify quick wins for cost reduction (No site visit required)
- » Producing a brief cost/benefit analysis
- » Securing all possible utility, state, and Federal grants, rebates, and incentives
- » Ensuring your facilities will be ready to go back to full operations with a minimum of effort and cost.

We understand that funds may not be available for this emergency initiative. We will work with you on a flexible payment plan or help you arrange third party financing.
